It's a pleasure to provide this letter of recommendation for Pacific Audio and Communications. Our experience with the company began with the design of an audio/video entertainment system for our residence at the Wailea Beach Villas. The goal was to integrate equipment and programming features into a system that would be easy to operate. Pat worked with us to understand how we would use the system and he made excellent suggestions regarding the type of gear to suit our needs. Without question, the success of the project can be attributed to the thorough pre-installation preparation by Pat and his staff. Detailed drawings were created which ultimately served as the installation roadmap. Costs were clearly delineated and there were no surprises. The project was accomplished on schedule. Sufficient time was also allotted for any final programming adjustments.

Simply put, Pat and his staff know what they are doing. Our system works great! It is without hesitation that we would highly recommend Pacific Audio and Communications.
